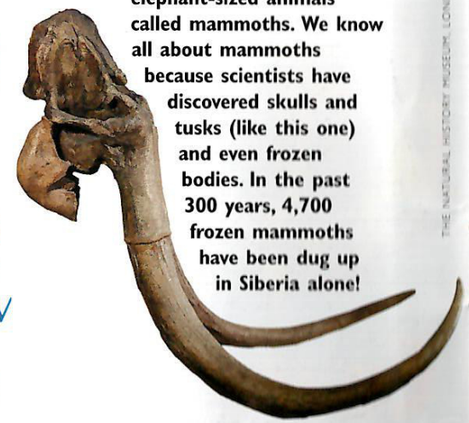
TRAVEL BACK IN TIME WITH WALLY

HI THERE WALLY TIME TRAVELLERS!

JOIN ME ON AN UTTERLY AMAZING TRIP THROUGH TIME! THIS WEEK WE'RE OFF TO MEET CAVE PEOPLE AND FIND OUT HOW TO CATCH A MAMMOTH! THEN WE'RE WHIZZING ON TO DISCOVER WHO HAD THE BRIGHT IDEA OF MOVING OUT OF A COLD CAVE AND INTO A HOUSE. BRILL!

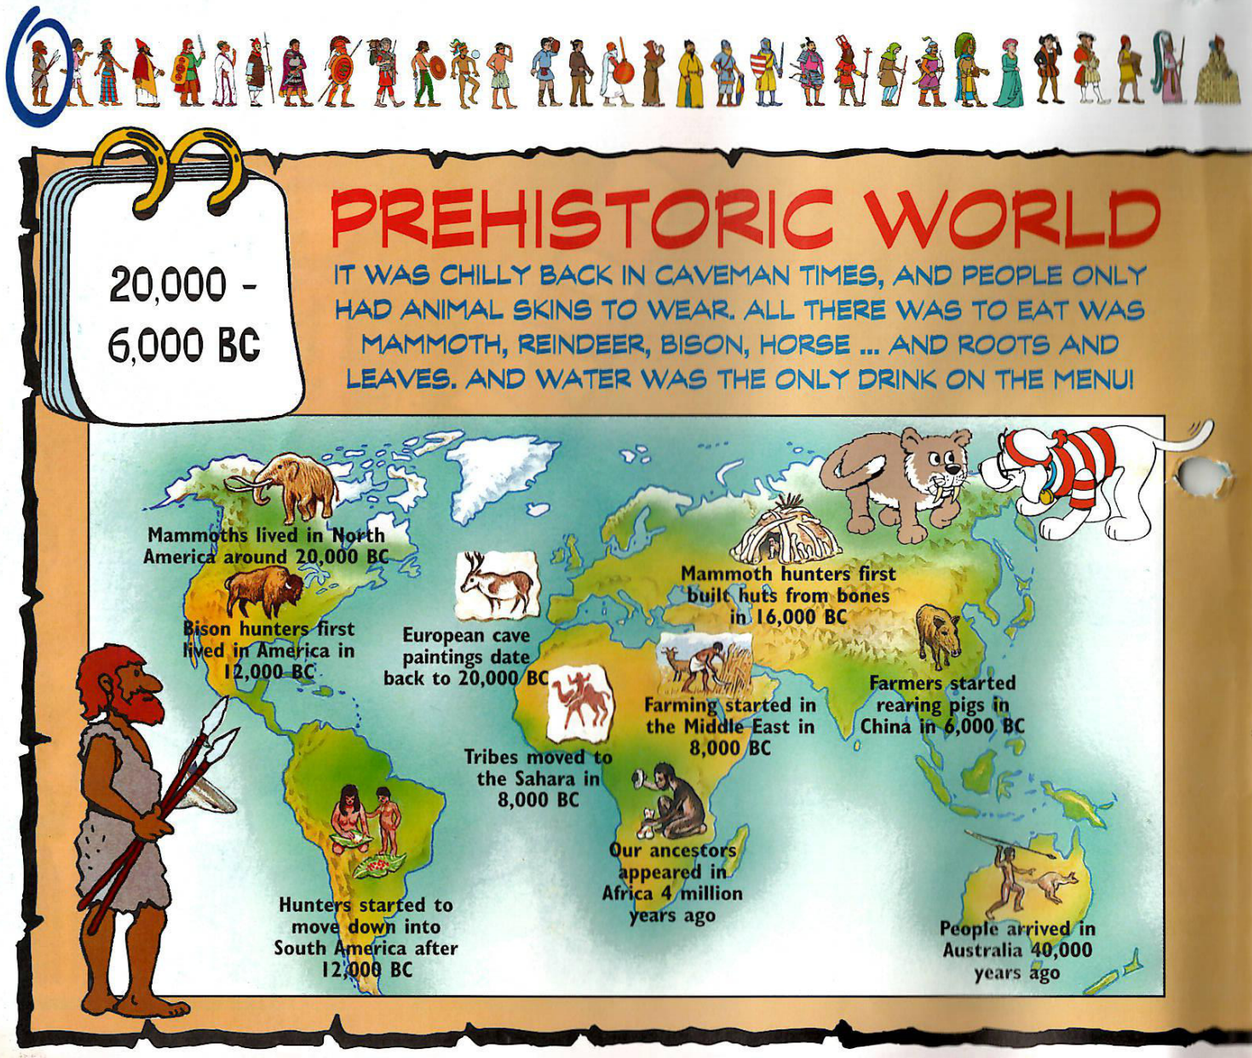


Cave people hunted elephant-sized animals called mammoths. We know all about mammoths because scientists have discovered skulls and tusks (like this one) and even frozen bodies. In the past 300 years, 4,700 frozen mammoths have been dug up in Siberia alone!

THE NATURAL HISTORY MUSEUM, LONDON

C.M. DIXON

Cave people painted or carved pictures on their cave walls. They also carved figures from tusks, bone and stone. No-one knows why they made these things. Perhaps it was to bring them success in hunting or perhaps they just did it for fun!



WHEN IT HAPPENED

65 MILLION YEARS AGO	THE DINOSAURS DIED OUT. THEY HAD RULED THE EARTH FOR 140 MILLION YEARS.
4 MILLION YEARS AGO	OUR APE-LIKE ANCESTORS FIRST APPEARED. THEY LIVED IN AFRICA.
2 MILLION YEARS AGO	PEOPLE WHO USED TOOLS MADE FROM STONES AND BONES APPEARED. THEY SPREAD OUT AROUND THE WORLD.
1.8 MILLION YEARS AGO	PEOPLE DISCOVERED FIRE.
40,000 YEARS AGO	EARLY MAN LIVED IN CAVES AND MADE TENTS, HUNTED WILD HORSES, MAMMOTHS AND REINDEER.
10,000 YEARS AGO	PEOPLE BEGAN TO SETTLE DOWN IN VILLAGES AND STARTED TO FARM.

WALLY'S STONE AGE WORDS

BC - STANDS FOR 'BEFORE CHRIST'. ALL THE PEOPLE WE ARE VISITING THIS WEEK LIVED LONG BEFORE JESUS CHRIST WAS BORN. HE WAS BORN OVER 2,000 YEARS AGO, SO 6,000 B.C. IS ACTUALLY 8,000 YEARS AGO!

PREHISTORIC - 'PRE' MEANS BEFORE. ALL THE THINGS THAT HAPPENED BEFORE PEOPLE LEARNED HOW TO WRITE AND KEEP RECORDS ARE PREHISTORIC.

STONE AGE - THOUSANDS OF YEARS AGO WHEN PEOPLE USED STONE TOOLS.

SEARCH AND FIND

THESE SIX THINGS ARE HIDDEN IN THIS TRULY TERRIFIC ISSUE. CAN YOU FIND THEM ALL? PLUS THERE ARE 46 MAMMOTHS PLODDING THROUGH THE PAGES FOR YOU TO SPOT!

TIME TRAVELS

WORLD OF ICE

BRRRR, WALLY WATCHERS! NO WONDER CAVEMEN WORE THICK FURS TO KEEP THEM WARM - THEY WERE LIVING IN THE ICE AGE!

So cold!

About 100,000 years ago the Earth started to freeze – the Ice Age had begun! The planet was at its iciest about 18,000 years ago. It was so cold that a third of all the land was covered in ice 2.5 km (1½ miles) thick! There were big icebergs floating in the sea in places we now go for a sunny summer holiday. Animals grew thick coats to keep warm. The ones that didn't died out.

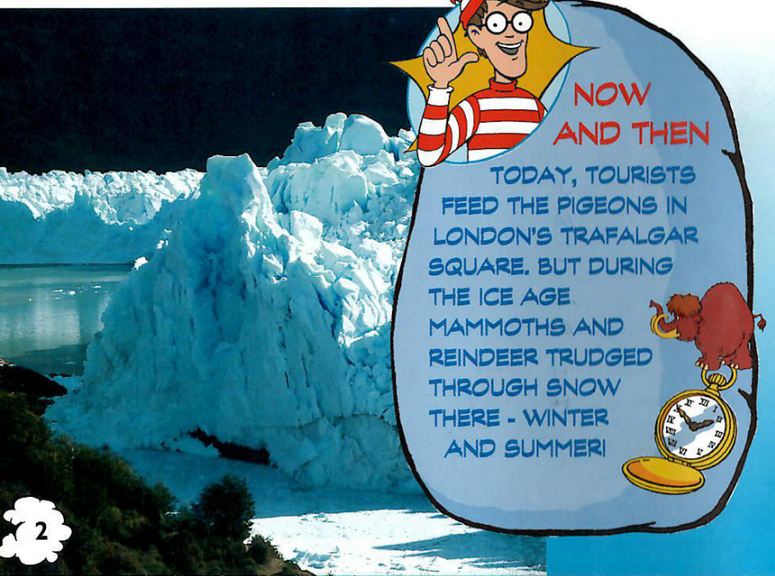
Keeping warm

Woolly mammoths were covered in a layer of fat 8 cm thick, as well as lots of hair. They were happy to snuffle about in the snow. In fact most Ice Age animals were bigger and shaggier than their modern relatives! There were giant rhinos, sloths, bison, deer, and bears too.

People weren't as tough as these big beasts. Ice Age people had to move south and live at the edge of the ice. But even there, it was very, very cold.

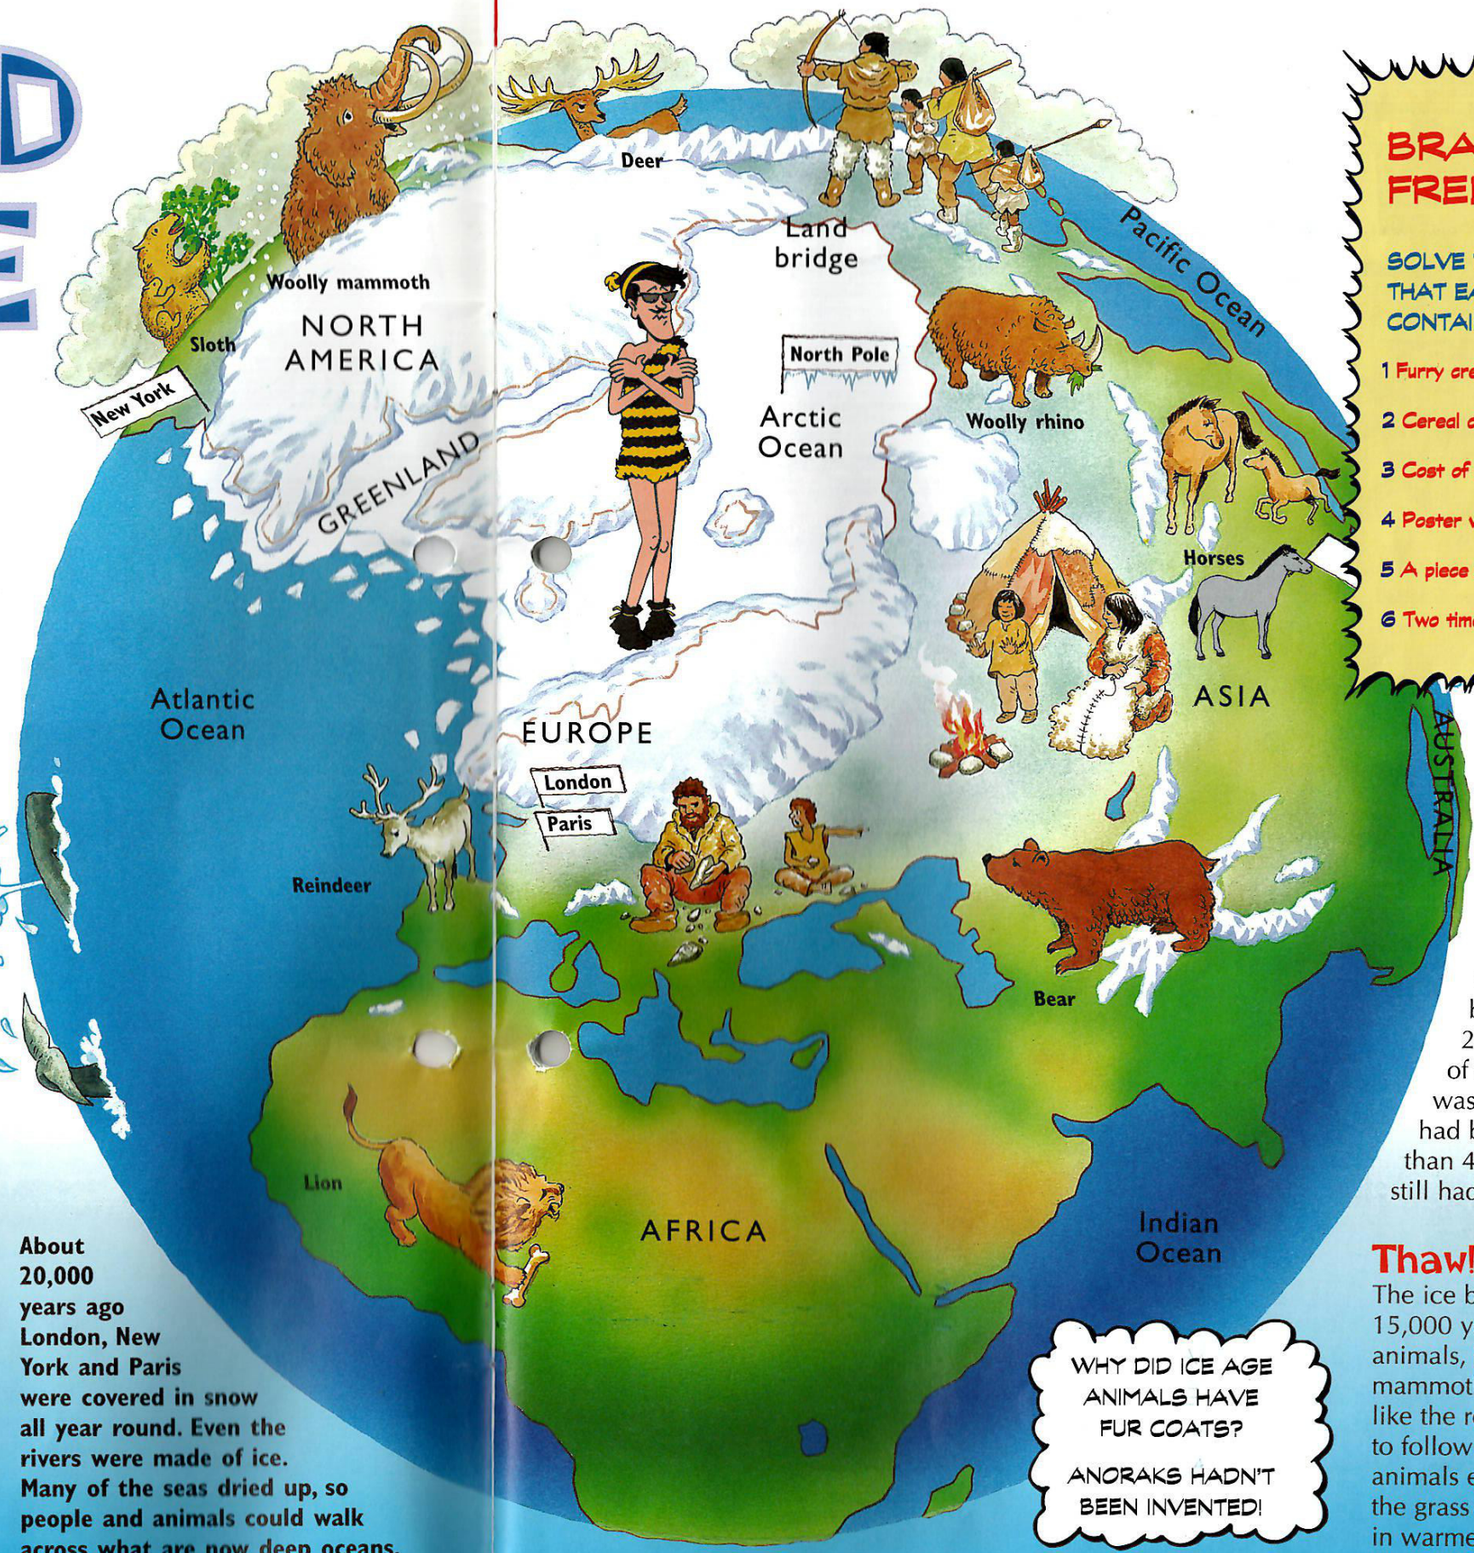
These glaciers are in Argentina, near the South Pole. This is what London must have looked like during the Ice Age!

TRIP – D. SAUNDERS



NOW AND THEN

TODAY, TOURISTS FEED THE PIGEONS IN LONDON'S TRAFALGAR SQUARE. BUT DURING THE ICE AGE MAMMOTHS AND REINDEER TRUDGED THROUGH SNOW THERE - WINTER AND SUMMER!



About 20,000 years ago London, New York and Paris were covered in snow all year round. Even the rivers were made of ice. Many of the seas dried up, so people and animals could walk across what are now deep oceans.

WHY DID ICE AGE ANIMALS HAVE FUR COATS?

ANORAKS HADN'T BEEN INVENTED!

BRAIN FREEZER

SOLVE THESE CLUES SO THAT EACH ANSWER CONTAINS THE WORD ICE.

1 Furry creatures — MICE
2 Cereal crop — RICE
3 Cost of something — PRICE
4 Poster with info — NOTICE
5 A piece of bread — SLICE
6 Two times — TWICE

Freezer!

When some Ice Age animals died their bodies got covered in ice and snow. The ice acted like a big food-freezer and kept the bodies fresh! About 20 years ago the body of a baby mammoth was dug up in Siberia. It had been frozen for more than 40,000 years but it still had a coat of thick fur!

Thaw!

The ice began to melt about 15,000 years ago. Many big animals, including woolly mammoths, died out. Some, like the reindeer, moved north to follow the snow. Other animals enjoyed feeding on the grass that began to grow in warmer areas. People liked the warmer weather too!

THE Ice Man

LET'S FIND OUT SOME AMAZING FACTS ABOUT THIS PREHISTORIC MAN, WALLY FANS!

Frozen find

In 1991 a frozen body was found in the Alps. At first people thought it was a climber who had fallen. Then they realized the body was over 5,000 years old! Scientists set to work to keep the body frozen. If it thawed it would go off!

Experts have found out a lot about the Ice Man by studying his remains. They think he was a shepherd or a hunter travelling through the Alps. A snow storm blew up and he stopped in a hollow by a glacier. He fell asleep and froze to death. His body was buried in snow, which then turned to ice. This preserved it, just like a freezer!

This is how experts think the Ice Man looked when he trekked through the Alps. He had a bow and arrows and an axe for chopping wood. His clothes were made of tiny pieces of sheep's skin sewn together.

WHO AM I?

My first is in **SEARCH** but isn't in **SHARE**.
My second is in **MAMMOTH** and also in **BEAR**.
My third is in **VENTURE** but isn't in **RETURN**.
My fourth is in **BURNER** but isn't in **BURN**.
My fifth is in **TIME** but isn't in **TIDE**.
My sixth is in **RAIDER** but isn't in **RIDE**.
My seventh is in **MEANT** but isn't in **TAME**.
Now take all the letters and spell out a name!

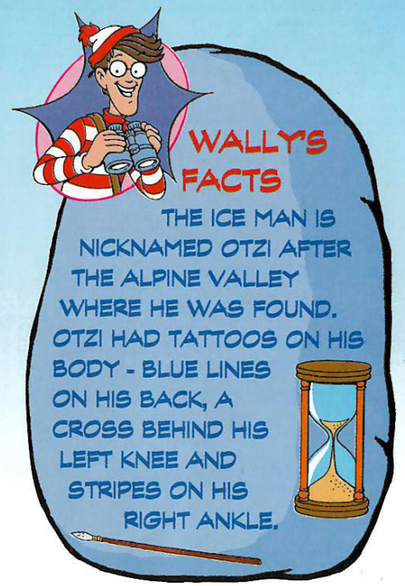
C M V E M A N

Mountain man

The Ice Man was about 1.5 m tall and had curly brown hair. He wore a leather tunic and trousers and had a fur hat. His leather shoes were stuffed with grass to keep his feet warm. He also had a cloak made from plaited grass. On his back the Ice Man carried a leather rucksack. The Ice Man probably put on all the clothes he owned for his cold journey. But compared with what climbers wear today his clothes were not very warm.

Arrows and axe

The Ice Man carried some wooden arrows in a quiver made from deer skin. Two of the arrows were ready to use. They had feathered ends and stone tips. The Ice Man also had a flint knife and an axe. The axe had a blade made from copper. There were hairs from wild goats and deer on the Ice Man's weapons so we know what animals he hunted. There was also porridge on the axe! He was probably having a quick snack as he trudged along.



REX FEATURES

Scientists (above) will carry out tests on Ice Man for years to come.

Ice Man's axe had a sharp copper blade. It was tied to the handle and glued in place with tar.

SYGMA

TEACHER: WHAT CAME AFTER THE ICE AGE?

PUPIL: WAS IT THE SAUS-AGE, SIR?

Climbers in the Alps today wear waterproof clothes and strong plastic boots to keep them warm, safe and dry.

ZEFA

TIME TRAVELS

THAT'S MY CAVE!

HI, WALLY FANS! WE'RE WHIZZING BACK ABOUT 20,000 YEARS TO MEET SOME COOL CAVE PEOPLE!

These cave people are trying to stop a sabre tooth tiger from taking over their home! They're hoping to scare it off with a flaming torch.

On the move

Cave people were nomads – they didn't stay in one place. Instead they followed the herds of wild animals that roamed the countryside. That way they always had a supply of fresh meat! In the summer people lived in tents made from animal skins. In the winter they looked for a cosy cave to settle down in.

WHY DID CAVEMEN HAVE MEALS IN THE MIDDLE OF THEIR CAVES?

THEY WANTED CENTRAL 'EATING!

FAB FIRE FACTS!

PEOPLE PROBABLY FIRST DISCOVERED FIRE WHEN LIGHTNING HIT A TREE. LATER THEY FOUND OUT HOW TO MAKE THEIR OWN FIRES BY RUBBING TWO STICKS TOGETHER. CAVE PEOPLE CARRIED BURNING STICKS WITH THEM TO START A NEW FIRE WHEN THEY MOVED CAVE.

Housing shortage

Fierce animals like bears, cave lions and sabre tooth tigers sometimes wanted to move into the same cave! Then the cave people had to defend their home. Fire was a good weapon. Cavemen also had clubs and spears made from wood or bone. They used sharp stones called flints to make axe heads, spear points and knives.

BRUCE COLEMAN LTD

Imagine finding this tiger trying to move into your house! Sabre tooth tigers had even bigger teeth than tigers – up to 20 cm long. They could have killed a caveman with one bite!

C.M. DIXON

This painting of a bison was found in a cave in France. In the Stone Age, bison lived all over Europe, now they are only found in Poland and Russia.

Paintings on the wall

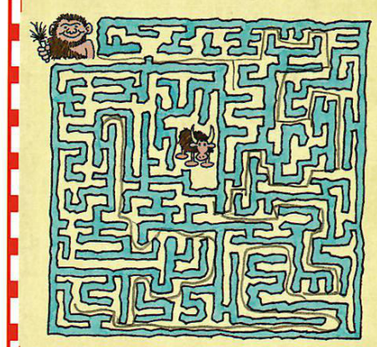
Some cave people painted pictures on cave walls. They used charcoal from the fire and coloured earth for paint. They made paintbrushes from animal hair, plant stems and sticks. The paintings showed the animals they hunted.

Finding food

The most important job for every cave man, woman and child was to find food. Sometimes the hunters killed a big animal like a bison, reindeer, mammoth or horse. Then there was meat for everybody. But often the women and children had to spend all day searching for food. They collected birds' eggs, caught small creatures like lizards, and gathered plants, berries and nuts.

CAVE MAZE

CAN YOU HELP THE STONE AGE HUNTER REACH THE BISON HE'S HOPING TO HAVE FOR TEA!



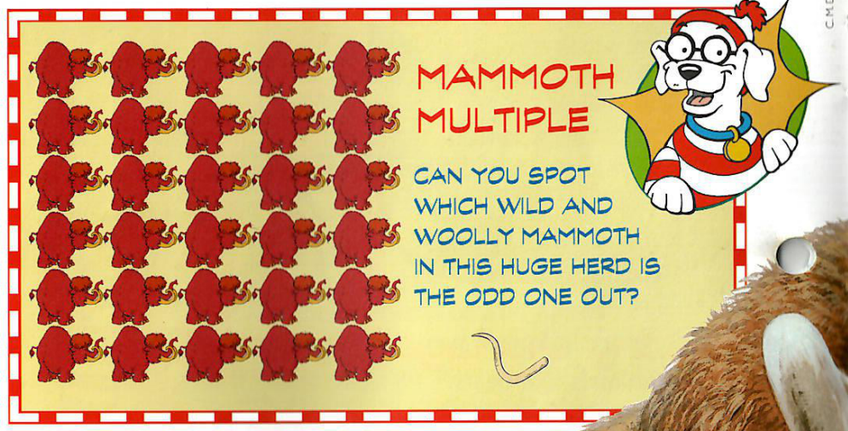
WENDA REPORTS BACK

MAMMOTH shopping spree

THERE WERE NO SHOPS IN THE STONE AGE WALLY FANS. SO CAVE PEOPLE HAD TO TRY AND CATCH A MAMMOTH INSTEAD!

Hunting for lunch

An adult woolly mammoth was about the same size as an elephant. It had teeth the size of bricks and curved tusks up to 4 m long! So it wasn't very easy to catch. Early hunters set traps for them by digging huge holes. They covered the holes with branches. When a mammoth walked over the branches – Crash! It fell in.



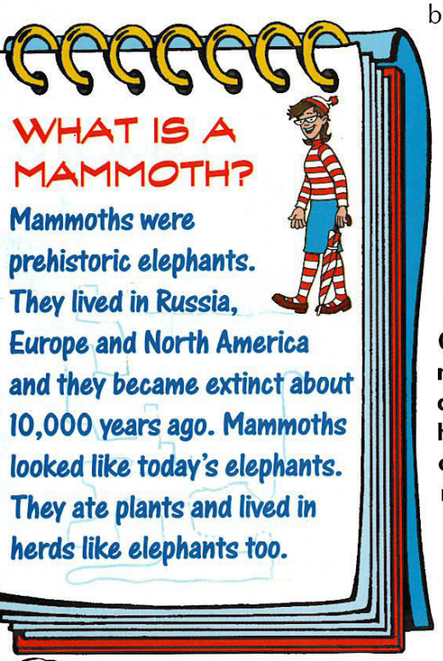
MAMMOTH MULTIPLE

CAN YOU SPOT WHICH WILD AND WOOLLY MAMMOTH IN THIS HUGE HERD IS THE ODD ONE OUT?

Cave cookery

The meat from one mammoth could keep a group of cave people fed for weeks. Having mammoth for every meal was boring, but it was better than being hungry! Cave women probably dried some of the meat in the sun. They kept this to eat during the long, cold winter.

One type of mammoth was covered in thick hair. It was called a woolly mammoth!



WHAT IS A MAMMOTH?

Mammoths were prehistoric elephants. They lived in Russia, Europe and North America and they became extinct about 10,000 years ago. Mammoths looked like today's elephants. They ate plants and lived in herds like elephants too.

C.M. DIXON

Mammoth hunters built huts from mammoth tusks and bones. They used up to 600 bones for each hut!

WHAT DID THE MUMMY MAMMOTH SAY TO HER NAUGHTY BABY?

TUSK, TUSK!

One stop shopping

The mammoth's furry skin was cleaned and dried. Then it was cut up to make clothes and shoes. Large skins were sewn together to make tents. The ivory tusks were used to make huts and were carved into jewellery. One mammoth hunter has been found buried with 3,500 beautiful ivory beads and 40 mammoth bone bracelets!

FASHION FILE

Skins were pegged out in the sun to dry and scraped clean with stone tools.

Needles were made from bones and thread from animals' guts!

Furs and skins were all the rage in the Stone Age – there was nothing else to wear!

Tusks and teeth were carved into great beads and bangles.

BACK IN TIME BATTLE!

WATCH OUT, WALLY WATCHERS, IT LOOKS LIKE WE'RE ABOUT TO SEE THE BATTLE OF THE MASSIVE MAMMOTHS - AND THEY'RE NOT TOO BOTHERED WHO GETS IN THEIR WAY!

THERE'S PLENTY TO SPOT HERE - IF YOU DARE! FIRST FIND ME AND THEN THESE THINGS:

- A BIG, BROWN BULLY (WHAT AN UN-BEAR-ABLE FELLOW!).

Where's Wally? characters © (1998) Martin Handford

- SOMEONE WHO'S FOUND AN UNUSUAL TOOTHPICK.
- A CAVE BOY HAVING A SWINGING TIME!
- FIVE DOGS – I CAN COUNT ON YOU TO FIND THEM ALL!
- THE GOLDEN OBJECT FROM OUR NEXT DESTINATION (WHAT A CROOKED PLACE TO LEAVE IT!).

FINALLY, CAN YOU WORK OUT WHERE THIS IS FROM?

SNOW NO LONGER LINGERS ON CERTAIN STONY SUMMITS

WHAT DID CAVEMEN HAVE FOR BREAKFAST?

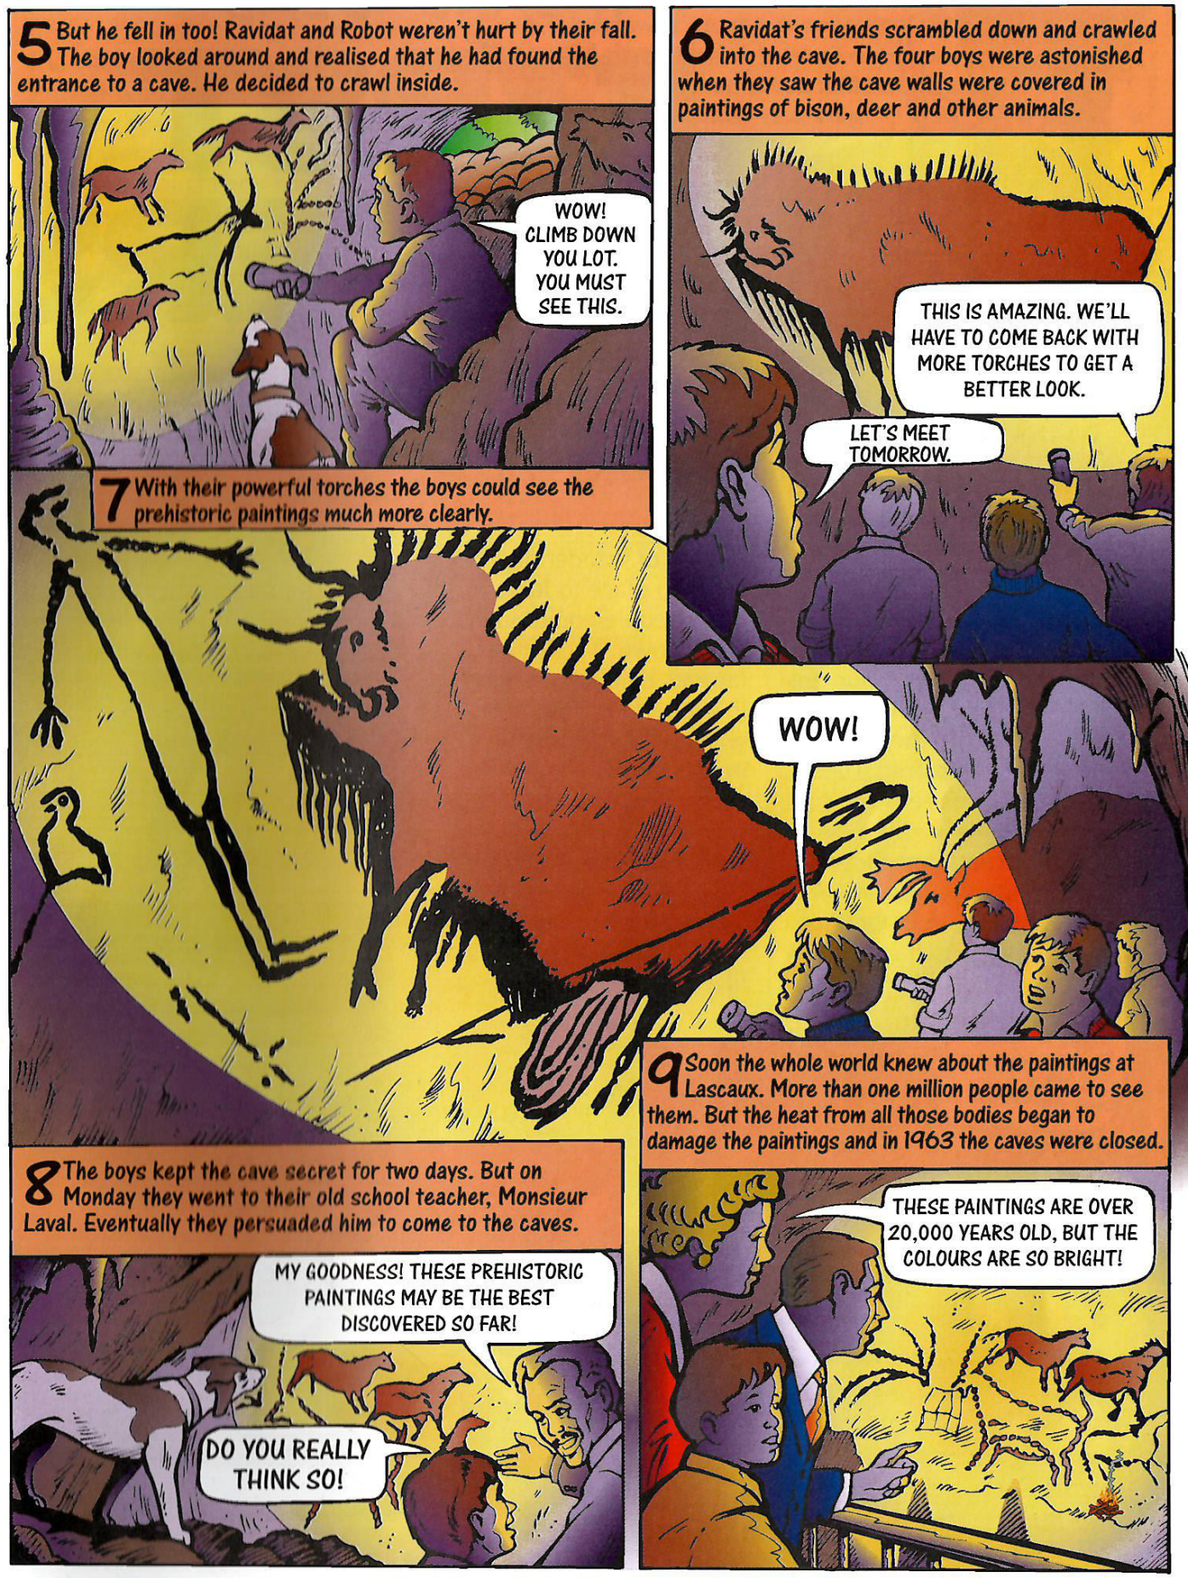
ICE CRISPIES!

THE GREAT CAVE MYSTERY

IMAGINE FINDING A CAVE AND THEN DISCOVERING IT HELD AN INCREDIBLE SECRET - A SECRET THAT HAD BEEN HIDDEN FROM THE WORLD FOR THOUSANDS OF YEARS!

No-one knew that cave people painted pictures until about 150 years ago. That's when the first ancient paintings were discovered on the walls and ceilings of caves. Some prehistoric art has been found by experts hunting for clues about cave life. But people have also come across painted caves by accident. Children have made some of the most important finds!

In 1834, at Chaffaud in France, people out walking stumbled across a cave. The walls were covered in drawings of an extinct species of deer. These were the first cave art discoveries. In 1879, a father and daughter wandered deep into a cave in Altamira, Spain. When their eyes became used to the darkness, the girl looked up and saw bison dancing across the roof of the cave! In 1940 four French boys out playing with their dog made the most exciting discovery of all!



WIZARD IDEAS

FIRST FARMERS

GROWING CROPS AND TAMING ANIMALS WERE TWO OF THE BEST IDEAS EVER. IN FACT, THEY WERE SO GOOD WE'RE STILL DOING IT TODAY!

Getting warmer

After thousands of years, the Ice Age ended and the weather started getting warmer and wetter. So more plants grew and that's when humans came up with a really bright idea. They saved the seeds from tasty wild plants. Then they sowed the seeds carefully so more plants would grow.

These people were the first farmers and their idea changed how humans lived.

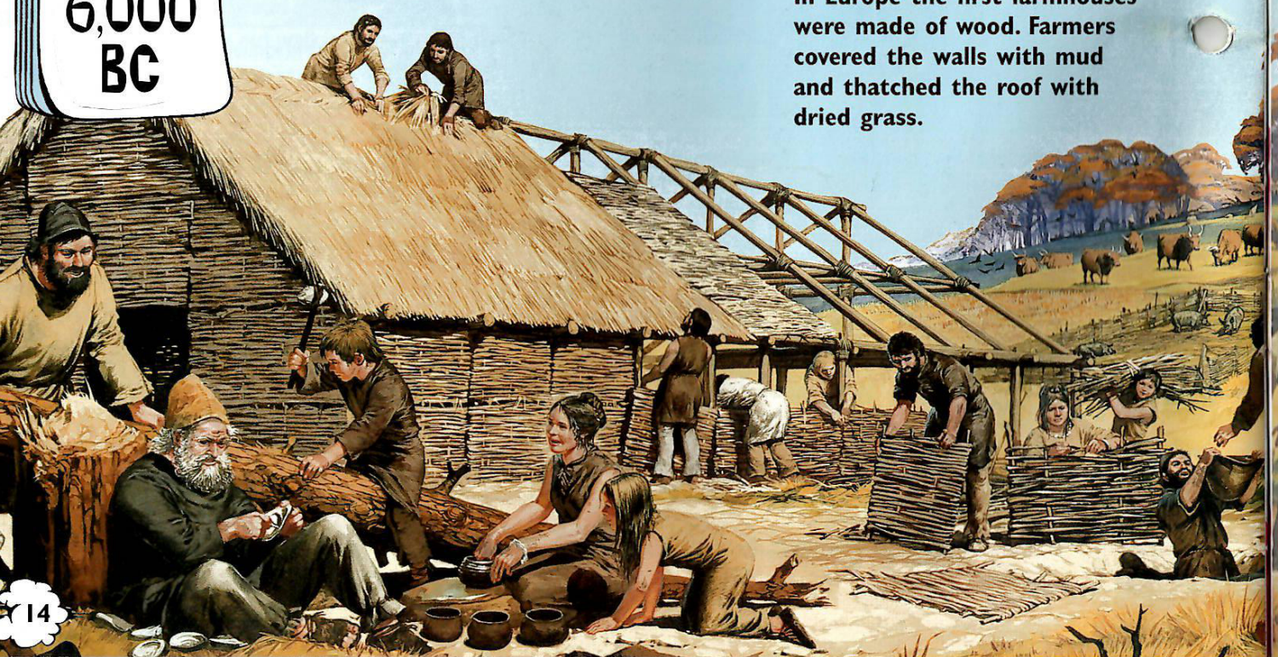
6,000 BC

Nomads no more

Instead of wandering from place to place to look for food, people could now settle down. These first farmers built houses next to their crops. They used whatever they could find – mud, wood or stone – to make their houses. Villages started up and farmers worked together to harvest crops. Now they didn't have to keep moving, people could make and keep more things like pots, jewellery and toys.

SMELLY FACTS

THE FIRST VILLAGES WERE PROBABLY VERY SMELLY AND DIRTY! THERE WERE NO TOILETS OR DRAINS. AND FARMERS KEPT CATTLE, SHEEP AND PIGS IN THEIR HOUSES AT NIGHT. THIS WAS TO PROTECT THE TAME ANIMALS FROM THE WILD ONES!



In Europe the first farmhouses were made of wood. Farmers covered the walls with mud and thatched the roof with dried grass.

Pet wolves

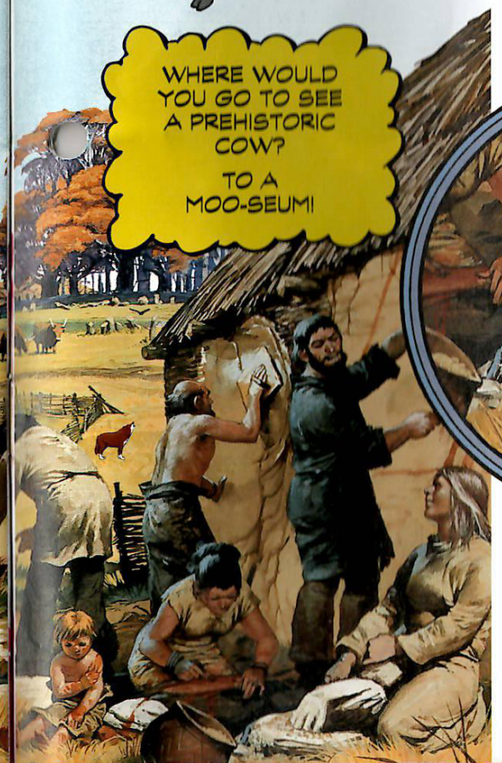
The villagers came up with another wizard idea – keeping animals. The first animals they tamed were probably wolves. Later, they caught and tamed wild sheep, goats, cows, pigs and donkeys. The wolves were useful for herding animals, just like sheep dogs do today.

New clothes

These early farmers also discovered how to spin and weave using wool from their sheep. At last they had something to wear that wasn't furry!

WHERE WOULD YOU GO TO SEE A PREHISTORIC COW?

TO A MOO-SEUM!



A tame cow is much easier to deal with than a wild mammoth! A herd of cows meant early farmers had meat, milk and leather on their doorstep.

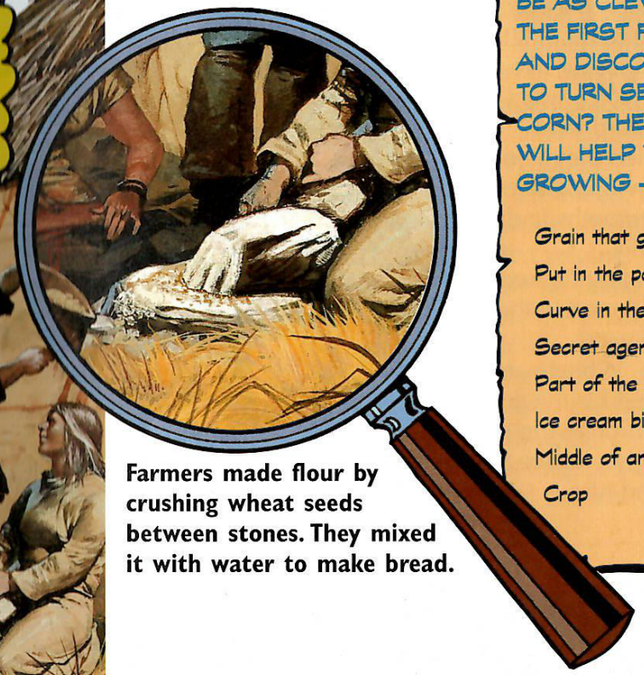
JOHN CANCALOSI – BRUCE COLEMAN LTD

Crafty!

People also found out how to make things from the soft, squashy earth we call clay. They baked the clay in the sun or in a fire. Pots made from clay lasted a long time and were used for cooking and for storing food.

Sharp idea

Early people only had tools made from stones. Then, about 9,000 years ago, people discovered metal. They dug copper out of the ground and hammered it into different shapes. Now they could make sharp tools, pointed weapons and great jewellery!



Farmers made flour by crushing wheat seeds between stones. They mixed it with water to make bread.

WALLY AND THE WILD WOLVES

When an injured wolf hides in a cave, Wally and Woof think it's time to show the cave people how friendly she can be...

Wally, Woof and Wizard Whitebeard were admiring the star exhibit in the Museum of the Wild and Woolly. It was a model of a Stone Age mammoth.

'Just look at those tusks!' said Wally.

'Magnificent,' agreed Whitebeard. 'Did you know some mammoths got to be much bigger than elephants but only ate grass and leaves?'

'Pshaw,' sneered a voice from behind a giant fossil, 'that wouldn't have kept a dinosaur like T. Rex happy for long!' The voice was Odlaw's but no-one had heard him.

Wally studied the mammoth from all sides. 'How I would love to meet real mammoths and cave people,' he said.

'Why don't you?' asked Whitebeard. 'I'm off to the Big Bones Café now, anyway.'

'Great idea, Whitebeard.'

Wally waved his magic walking stick and stepped through the portal with Woof. He did not notice Odlaw slip through behind him.

Soon Wally and Woof were standing near a burning fire outside a cave. A woman and child appeared carrying sticks. They smiled and laughed when they saw Wally and Woof.

'How do you do?' said Wally. 'I am Wally and this is my dog, Woof.'

'I am Lula and this is Fern, my daughter. Where are you from?'

'Ahh–oh, not far away! But we've never been here before. And we so wanted to see a huge, woolly mammoth ...'

'And in return you have brought a tiny animal to show us!' said Lula. Woof wagged his tail.

'Come and see our cave,' Fern added.

A man was standing just inside the cave entrance. Lula introduced Wally and Woof to her husband, Nim. Nim watched his daughter who was laughing at Woof's antics.

'Please stay with us for a few days, Wally and Woof,' he said. 'Lula, will show you where to sleep.'

By the light of a flaming torch Lula guided the friends along a passage to an inner cave, where animal skins had been laid out on bundles of dried grass.

'This is the strangest place I've ever slept in,' yawned Wally, after Lula had gone.

'Woof!' agreed Woof.

Soon they both fell asleep. But a short while later Wally woke up with a start. He could hear a muffled yelping.

'What is it, Woof?' he called out, fishing in his bag for his torch. He flashed it around their cave but could see nothing except a sleepy Woof opening his eyes. Then Woof jumped up. He'd heard the noises too! The friends went off to investigate, winding their way through a long passageway which at last opened out into a low cave.

Wally flashed his torch around the cave, and there, huddled in the corner, was a large she-wolf and four cubs. The cubs were asleep against their mother, who looked sick and worn out. Now and then she licked a nasty cut on her foreleg.

'Poor thing,' whispered Wally, 'she really needs help. We'll have to tell Nim and Lula about her as soon as it's light.' The friends made a soft bed of dried grass for the wolf and then went back to bed.

Next morning, they told Nim, Lula and Fern about their night-time adventure. At once Nim jumped up and reached for his flint axe.

'That's good luck. Their coats will make good winter clothes for the children.'

Wally thought quickly. 'Nim, what d'you think of this idea? You look after the cubs until the mother gets better. She might even learn to trust you and will help you as much as Woof helps me.'

'Woof, woof!' said Woof.

Slowly Nim put his axe back. 'Well, I'll give it a try, but ...'

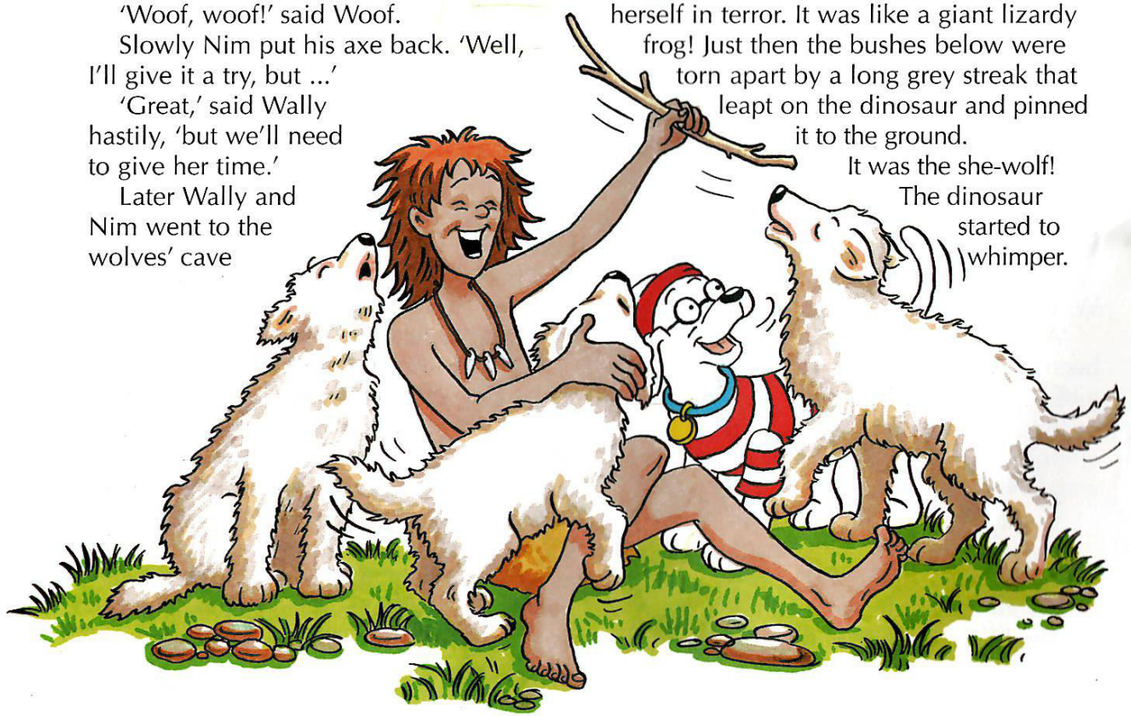
'Great,' said Wally hastily, 'but we'll need to give her time.'

Later Wally and Nim went to the wolves' cave and together carried the she-wolf into the main cave where they could take care of her injured leg. The cubs tumbled and ran after them, led by Woof.

'I'll clean her wound and get her some food,' said Lula, going out to fetch water. The cubs ate everything they were given, and Woof even shared his biscuits with them. Day by day the mother grew stronger and the cubs grew bigger. Wally and Woof showed Fern how to throw sticks for them to find and bring back. Their mother liked watching them together.

One morning Fern went out to collect some firewood. On her way she saw a very strange creature coming straight for her! Fern quickly climbed up the nearest tree. From there she saw that the creature had sharp teeth and a long, spiky tail. Flashing an evil grin at her, it began prancing about. 'I've never seen anything like it,' the little girl thought to herself in terror. It was like a giant lizardy frog! Just then the bushes below were torn apart by a long grey streak that leapt on the dinosaur and pinned it to the ground.

It was the she-wolf! The dinosaur started to whimper.



Then came the sound of more tearing branches, as Wally, Nim, Lula and Woof burst onto the scene. Nim had his spear raised. At once the wolf let go of the dinosaur and moved quietly to stand beside him. What was the dinosaur going to do next? Slowly it sat up and, fumbling with its short arms, began undoing its green, warty skin – to reveal a yellow and black striped jumper and two skinny legs. Last of all appeared Odlaw's head. Nim lowered his spear in amazement.

'You're millions of years too late! Dinosaurs died out long before humans appeared!' exclaimed Wally.

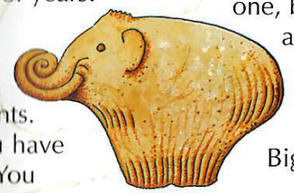
'Don't hurt me, Wally,' gabbled Odlaw. 'It was just my little joke. I was all set to kit myself out as the oddest dinosaur ever. I've been taking pictures of myself with the fab timing device on my camera and I was going to post the snaps to archaeologists and newspapers around the world. I've even written the caption: "The biggest dino discovery of all time: the Dinodlaw".'

'I think you should let us have the photos and go away now,' interrupted Wally.

Odlaw took a look at Nim's spear and then ran off, dropping the photos as he went. Wally called after him, 'Don't get trapped in a glacier or you won't be discovered for thousands of years!'

As soon as Odlaw had disappeared, Fern climbed down from the tree and hugged her parents. Nim patted the wolf. 'You have won your place with us. You protected one of our young, and we will not forget it.'

Then he turned to Wally. 'Come, I have something for you.'



Back at the cave, Nim presented Wally and Woof with a mammoth. Not a real one, but a beautiful miniature, carved from a mammoth tusk.

'That's wonderful,' gasped Wally. 'Let's go and show it to Whitebeard, Woof. I wonder if he's still in the Big Bones Café.'

THE END

IN PART 2 WALLY STOPS A FIENDISH PLOT TO STEAL PHARAOH'S CROWN!

PUZZLING PAST-TIMES

WELL, PUZZLE FANS, YOU'LL BE AMAZED AT HOW FULL OF WACKY WONDERS THE PAST CAN BE ...

Toothy Teaser

Can you work out the number pattern in this tusk and fill in the two missing numbers?

Wally's Time Quiz

CAN YOU WORK OUT THE RIGHT ANSWERS TO ALL THESE TRICKY TIME TEASERS WALLY WANDERERS?

1 Cavemen found all their food by:
a) hunting and gathering
b) growing crops and keeping tame animals
c) going to the shops

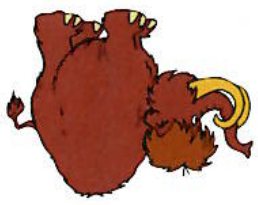
2 Ice Age animals grew woolly coats because:
a) it was the latest fashion
b) it was very cold
c) it was difficult to get to the hairdresser

3 The Ice Man stuffed his leather shoes with:
a) thick socks
b) woolly rhino fur
c) grass

4 People first started to sow crops about:
a) 10 million years ago
b) 10,000 years ago
c) 10 years ago

5 Cavemen had spears tipped with:
a) stones called flints
b) mammoth skin
c) copper

6 The first animals that people tamed were:
a) wolves
b) mammoths
c) sheep



7 The Stone Age got its name because:
a) People wrote on stones
b) People used stones as tools and weapons
c) King Stone ruled

8 Cave people liked to eat:
a) bread
b) mammoths
c) dinosaurs

9 Cave people made jewellery from:
a) teeth
b) gold
c) plastic

10 Mammoth tusks were made of:
a) hair
b) stone
c) ivory

Contents page: Search and Find Wolf – **page 15**, tusk – **page 8**, club – **page 17**, horse – **page 3**, fire – **page 13**, spear – **page 5**
page 3: Brain Freezer Mice, rice, price, notice, slice, twice.
page 4. Who Am I? Caveman.
page 8: Mammoth Multiple The odd one out is in the second row, second from the right – it's got shorter tusks than the others.
pages 10–11: Wally's on top of the middle mammoth; the bear's below the mammoth; the man with the bird dentist is near the bear's back; the boy is swinging at the back of the mammoth; the pharaoh's crook from Egypt is underneath the red sabre tooth tiger. The picture's from the bottom left corner – it shows part of the two men hung up on a huge tusk.
page 15: Wenda's Fun Farm Puzzle Seed, send, bend, Bond, bone, cone, core, corn.
page 20: Toothy Teaser 134 and 356. **Spot the Difference** The eight differences are shown on the left. **Animal Trail** Mammoth, sabre tooth tiger, woolly rhino, reindeer, dog. **A Sticky Situation** Ug could pick up ten pieces of firewood. **Bare Bones** The solution is on the right.
